

The Cachimbo Air Base is a support base located in Serra do Cachimbo, south of Pará State, in the Amazon Forest.

The unit was created with the main objective of serving as a base of support for aircrafts operations in the traffic link between the north and southeast of Brazil. Previously, the path could only be secure by following the coast.

The official opening was on January 20th, 1954, with the President of the republic (Brazil) Getúlio Vargas and the Minister of Aeronautics Nero Moura.

Subsequently, on March 7th, 1979, Cachimbo, Curuaés and Gorotire was constitute an area for the development of testing of weapons, military artifacts, experiments, training and other operations of interest of Armed Forces of Brazil.

You will be working on a basic training operation in a float plane of your choice to practice a basic water landing on the Teles Pires River.

If you are using FSX, download the freeware scenery for [Cachimbo Air Base](#).

We will be flying from SBCC (Cachimbo Air Base) to the Teles Pires River. Once Departing SBCC, turn heading 240 until you intercept the river (About 50nm), once there you can practice your water takeoffs and landings as much as needed, and then return back to the air base!

Flight Information

Route: Depart SBCC, Fly Heading 240 Until you Intersect the River

Weather: Set to Real World (Updated 15 Minutes)

Aircraft: Any float plane aircraft. (Recommended: Aerosoft PBY Catalina, Captain Sim C130 Float)
